Grading Rubric

CS 250   Assignment 2

Total Points: 100

Points Allocation:
> Part A:
>> - Compilation & running as expected, giving right output   20
>> - Comments and Indentations   05
>
> Part B:
>> - Compilation & running as expected, giving right output   10
>> - Correctly splitting the program into the exact required modules   60
>> - Comments and Indentations   05

Important Notes:
- Submit all files from your project folder, including the .cpp, .cbp and .h

- Zip the entire folder and name it as "Assg2_cslogin", where the cslogin is your login ID for the computers at the Department of Computer Science at ODU.

- Submission with a different file name other than Assg2_cslogin, will receive -10 points off your final points for the assignment. The cslogin is your login ID for the computers at the Department of Computer Science at ODU.

- Penalty for using global variable(s) is -10 points off your final points for this assignment.

- For any submission that fails compilation we will not run any test on your submission.

- Students are allowed to submit only 3 times before the due date, we will only mark your last submission.

- Start working on the assignment(s) sooner rather than later. You are expected to give yourself enough time to complete the assignment(s) before the due date. Any submission after the due date will not be graded (unmarked).

- Assignments submitted through Email's will not be accepted and they will not be graded.
